Section I. Introduction

Savannah River Site

Administrative Record Files and Information Repository Files

An Administrative Record File contains the documents and information considered or relied on in the selection of a response action and in controlling hazardous waste management activities. At the Savannah River Site (SRS) the Administrative Record File will fulfill the requirements of the Section XXXIV, Administrative Record, of the Federal Facility Agreement (FFA).

An Administrative Record File for an individual unit is initiated upon the approval by the United States Environmental Protection Agency - Region 4 and the South Carolina Department of Health and Environmental Control of a Resource Conservation and Recovery Act Facility Investigation/Remedial Investigation (RFI/RI) Work Plan. The File is compiled until the decision of the response action is chosen (the signing of the Record of Decision). At that time the Administrative Record File is finalized and is called the Administrative Record (AR) for that unit.

An Administrative Record serves as two primary purposes. Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) provides the public with an opportunity to participate in a response decision. Section 113(k)(2) of CERCLA provides the public with an opportunity to participate in a response decision. The AR makes available the information considered or relied on in the selection and provides the opportunity for public involvement. Without opportunity for this

involvement of interested persons, the limitation of court review solely to the AR can be challenged. Therefore, the AR will also record the public participation in the decision process and reflect the views of members of the public.

The second purpose of the AR is concerned with the presentation of evidence in the event of litigation. Judicial review of any issue concerning the adequacy of a response selection is limited to the AR. Under section 113 (j)(2) of CERCLA, the trial court reviewing the selected response decision is limited to the facts as set out in the AR. The courts will not allow the use of discovery, hearings or additional fact-findings unless the AR is found to be incomplete or poorly prepared. Provided the AR is adequate, the court will limit its review of the response decision made to the standard of arbitrary and capricious, or otherwise not in accordance with the law. The AR should, therefore, chronicle the response decision process whereby a judge could easily follow how and why a decision was made.

An Information Repository File (IRF) contains information and documents that do not meet the definition of ARFs, but contain site and unit information, documents on site and unit activities, and general information.

Section II. Instructions

The index for each unit is located in Section V of this document. The documents are arranged by a catalog number, which is assigned to each document as received by the Administrative Record File Coordinator. Each index contains a field for microfilm cartridge or compact disk (CD) number. The number in this field is associated with the microfilm cartridge, or CD, on which the document can be found.

The catalog number identifies each document on the CD.

Example of index for documents on CD:

Catalog #	Title	CD #
005082	Record Of Decision Remedial Alternative Selection for the C-, F-, K-, And P-Area Coal Pile Runoff Basins (189-C, 289-F, 189-K, and 189-P) (U)	19

By double clicking on Catalog #005082 on CD #19 you will open the Adobe PDF file using Adobe Reader, which is available free on the WEB. This will open a read-only copy of the document.

Example of index for documents on microfilm:

Catalog #	Title	Microfilm
000774	4/57 Spill Site Evaluation Report	49/0006 0001

This document is on microfilm cartridge #49, document #0006 and begins with frame #0001 of that document.

The “File Type” on the index contains either IRF or ARF. See the Acronyms section of this report for definition of these terms.

Section III. Acronyms and Definitions

Definitions:

Administrative Record – completed compilation of all information and/or documents used by the DOE, EPA and SCDHEC to make their decision on the selection of a response action.

Administrative Record File – the ongoing collection of documents that will or are anticipated to constitute the AR when the selection of a response action is made for a given RCRA/CERCLA unit. Each unit may have an ARF that is distinct and unique to that unit. The ARF must meet the requirements of an administrative record file as stipulated in 40CFR300.

Administrative Record File/Information Repository File – a composite term used to identify the compilation of all documents relating to the remediation activities at the SRS for a given RCRA/CERCLA unit or response action.

AR – Administrative Record

ARF – Administrative Record File

ARF/IRF – Administrative Record File/Information Repository File

CERCLA – Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended by the Superfund Amendments and Reauthorization Act of 1986, 42 U.S.C.§ 9601 et seq.

Information Repository File – collection of documents related to a remediation activity for a given RCRA/CERCLA unit or response action. The IRF contains, for example, documents on site or unit activities, information about the unit location, and background program and policy guides, press releases, maps and other information to aid the public in their understanding of a site response, regardless of whether the information has bearing on the eventual response selection at that unit. These documents are not considered part of the ARF, but are provided to help the public in their understanding of the remediation activities.

IRF – Information Repository File

Section IV. List of Units

A. Operable Units By Watershed

[1] Units that are, or are associated with, units listed on Appendix H, Solid Waste Management Units.
[2] Units that have had an Interim or Early Action Record of Decision issued. If the Final Record of Decision has been issued for the units, then only the designation for the Final Record of Decision is shown.
[3] **Units that have had a Final Record of Decision issued.**
[4] Units that are located in more than one Watershed.
[5] Units that do not require a RCRA Permit modification (not subject to RCRA 3004(u) requirements).
[6] Units that were closed under RCRA.
[7] These ECODS are located in different watersheds; however, they have been combined from a remedial decision perspective due to similar characteristics.
[8] The A-Area Ash Pile (788-0A) and A-Area Coal Pile Runoff Basin (788-3A) will be addressed through one set of FFA documention due to their proximity to one another.
[9] This entry is for the environmental media associated with the 484-10D Facility.
[10] Refer to the Early Action Record of Decision for the D Area Operable Unit (DAOU) (SRNS-RP-2010-00162, Revsion 1.2, July 2011) for more information.
[11] This facility was not addressed per FDE protocols; however, this facility will receive final disposition as a remedial action conducted as part of the ongoing remedial action for the associated operable unit.
[12] These OUs will be addressed through one set of FFA documentation due to their proximity to one another.
[13] These OUs will be addressed through one set of FFA documentation due to their proximity to one another.
[14] These OUs will be addressed through one set of FFA documentation due to their proximity to one another.
[15] A separate schedule for the D-Area Effluent Discharge Canal and Ash Area Adjacent to and Easterly of D-Area Ash Basins 488-1D and 488 -2D may be developed by the Core Team pending the results of the D-Area Groundwater Operable Unit remedial investigation process.
[16] The Record of Decision for the Wetland Area at Dunbarton Bay (SRNS-RP-2013-00730, Revision 1, April 2018) was issued on June 02, 2018.
[17] The L-Area Rubble Pile (131-3L) Operable Unit (OU) was designated as a No Action OU in Fiscal Year 2018. The EPA and SCDHEC agreed on October 3, 2017 and October 25, 2017, respectively, to discontinue monitoring and reporting at the LBRP OU. On January 11, 2018, DOE requested that the LBRP OU be designated as a No Action OU since remediation goals had been met, monitoring and reporting had been discontinued, and the institutional controls (i.e., LUCs) were no longer required (IACD-18-122). SCDHEC and EPA approved the request on February 8, 2018 (ARF-021385) and February 16, 2018 (ARF-021416), respectively.
[18] The L-Area Hot Shop (LAHS) (717-G) OU was designated as a No Action OU in Fiscal Year 2014. The LAHS was categorized as a No Action site because the remedial goals for unrestricted land use were met and LUCs were no longer necessary. On February 6, 2014, DOE requested that the LAHS OU be designated as a No Action OU since the requirements stated in the Record of Decision (WSRC-RP-2002 -4025, Revision 1.1, May 2003) were met (ACP-14-127). SCDHEC and EPA approved the request on March 7, 2014 (ARF-019359) and March 20, 2014 (ARF-019384), respectively.
[19] Refer to the Second Early Action Record of Decision for the D Area Operable Unit (SRNS-RP-2018-00461, Revsion 1, July 2020) for more information.

SRS Index Number is a unique identifier assigned to each individual Unit
This number is used by SRS for tracking and is not meant to imply a ranking or priority.
