AREA COMPLETION PROJECTS

Re: Calendar Year (CY) 2021 Annual report Status of F/H Area Radioactive Liquid Waste Tanks Being Removed from Service, SEMS Numbers: 23 and 89 (SRR-ESH-2022-00019, Revision 0, March 2022) received March 8, 2022.

Dear Mr. Hennessey:

The Department has completed its review of the above referenced document pursuant to the Savannah River Site Federal Facility Agreement. The attached comments were generated as a result of this review. These comments must be addressed prior to final approval of the above referenced document. As specified in Section XXII, Review/Comment on Documents, the appropriate technical staff will be available to participate in a joint DOE/EPA/DHEC comment resolution meeting to discuss these comments, if necessary.

To schedule a meeting to resolve the attached comments or to obtain further information, please contact me at (803) 898-4331.

Sincerely,

Susan B. Fulmer, P.G., Manager
Federal Remediation Section
Division of Site Assessment, Remediation, Revitalization
Bureau of Land and Waste Management

Specific Comment

1. Appendix A: CY2021 Individual Tank Status Reports for the F- and H-Area Radioactive Liquid Waste Tank Farms, page 33. For Tank 23, the status discusses a transfer of 347,000 for SWPF Batch 5. It is unclear to which tank this material was transferred.
2. Appendix B: CY2021 Federal Facility Agreement System / Component Assessment Reports, Federal Facility Agreement Assessment Report for Transfer Hose in Hose Between Tank 9 and Tank 10, Attachment 9.0, Figure 9.1, HIH Transfer Line, page 9. Please include an illustration of the Tank 10 tank top or add a note stating that Riser 3 is not actually located in the center of the tank top as illustrated. The Tank 10 Center Riser occupies that location.
