RE: Facility Decommissioning Evaluation (FDE): Building 484-4D, Powerhouse Maintenance Facility, G-FDE-D-00037, Revision 0, November 13, 2019, Cover letter dated December 10, 2019

Dear Mr. Hennessey:

The South Carolina Department of Health and Environmental Control (SCDHEC) has reviewed the referenced document with respect to the Memorandum of Agreement for Achieving an Accelerated Cleanup Vision for the Savannah River Site (SRS). Please respond to the following comments.

General Comment

Photographs are not provided for the inside of the facility. Please provide photographs of the stained areas on the concrete slab in the Main Shop.

Specific Comments

Facility Description, Page 4 The first paragraph states that portions of the facility were heated for climate control. Please state the energy source that was used.

Process History, Pages 9 & 10 The first paragraph of this section states that there were no chemical processes in the facility yet the Chemical Process table on page 10 includes chemicals. Therefore a contradiction exists. Please address.

Part 2, Evaluation on page 12 The information presented in item # 1 is contradictory. It states that the facility contained hazardous materials yet an "X" is in the "No" column, thereby indicating that it did not. Please correct.

If you have any questions, please contact Leigh Beatty at 803-642-1637 or via e-mail at beattykl@dhec.sc.gov.

Sincerely,

Gregory N. O'Quinn
