Mr. Brian T. Hennessey
SRS Remedial Project Manager
Infrastructure and Area Completion Division
U.S. Department of Energy
Savannah River Operations Office
P.O. Box A
Aiken, South Carolina 29802

Dear Mr. Hennessey:

The U.S. Environmental Protection Agency has reviewed the Calendar Year 2018 D-Area Oil Seepage Basin Operable Unit (631-G) Groundwater Mixing Zone Letter Report (IACD-19-175, dated July 25, 2019). Based on document review, the Operable Unit (OU) 27 D Area Oil Seepage Basin Report for Calendar Year 2018, establishes that the monitoring system was installed and is operational for the remedy selected at OU-27. The Groundwater Mixing Zone Letter Report also documents the progress of the remedy in achieving the remedial goals (RGs). Based on the review of the 2018 D-Area Oil Seepage Basin Operable Unit Groundwater Mixing Zone Letter Report, the report is approved as documenting the Remedial Action Completion for the remedy at OU-27 of the Savannah River Site.

If you have any questions or require additional information, please contact the site's Remedial Project Manager, Jon Richards on (404) 562-8648.

Sincerely,

Randall Chaffins, Acting Director
Superfund & Emergency Management Division
