Re: Facility Decommissioning Evaluation (FDE): 200-F Area Entry Control Facility, Building 701-4F  
(G-FDE-F-00059 Revision 0, February 15, 2007), Cover letter dated March 20, 2007.

Dear Ms. Hammett:

The South Carolina Department of Environmental Services (SCDES) was recently contacted by Savannah River Nuclear Solutions (SRNS) regarding an approval letter for the document listed above. SRNS indicated there was no record of having received any type of approval letter from the Department, which at the time of submittal, was the South Carolina Department of Health and Environmental Control (SCDHEC). SCDES has reviewed electronic and hard copy files in the Regional office and Central office and acknowledges that there is no record of the Department submitting a letter of approval for the referenced document. Therefore, to complete the approval process for documentation within the Savannah River Site Administrative Record File/Information Repository File (ARF/IRF), SCDES has reviewed the referenced document and is submitting this letter as concurrence with the use of the Simple Model for decommissioning this facility.

If you have any questions, please contact me at (803) 508-7615.

Sincerely,

**Gregory N. O'Quinn, Manager**
