BASELINE ASBESTOS INSPECTION REPORT OF BUILDING SRS-PB-EX0035

On March 4, 2021, an inspection was performed to determine the presence of any suspect Asbestos Containing Material (ACM) in building SRS-PB-EX0035. The approximately 5' x 10' structure (unknown date of construction) is comprised of a metal framework finished with a wood floor, corrugated metal sides, back wall, and roof panels. The structure is supported by an affixed metal pallet (portable) and has no plumbing or electricity. SRS-PB-EX0035 was formerly used as a storage shed adjacent to the Coal Handling Crusher house in D-Area.

SUMMARY

No visible, suspect ACM was discovered at the time of this inspection. This evaluation was based on visual inspection and material knowledge. In accordance with 40 CFR part 61-145 a **ten-day notification** must be filed with the South Carolina Department of Health and Environmental Control (SCDHEC) to obtain a demolition license, regardless of asbestos content. This is in concurrence with Lance Cramer of the permitting section as he is copied on the memorandum.
