Mr. Brian T. Hennessey, SRS Remedial Project Manager  
Infrastructure and Area Completion Division  
U. S. Department of Energy  
Savannah River Operations Office  
Post Office Box A  
Aiken, South Carolina 29802

Re: Performance Evaluation Report of 2019 for the M-Area Inactive Process Sewer Lines (081-M) Operable Unit (U) – January through December 2019, SEMS Number: 19 (SRNS-RP-2020-00047, Revision 0, March 2020) received March 25, 2020.

Dear Mr. Hennessey:

The Department has completed its review of the above referenced document pursuant to the Savannah River Site Federal Facility Agreement.

SCDHEC agrees with the recommendation made by the project team, during the June 24, 2020 Core Team meeting, to discontinue the MIPSRL remedial action since remedial goals for TCE and PCE have been met with the SVE system at all four manholes. SCDHEC requests that the dismantling and removal of the active and passive SVE systems and the abandonment of all wells be completed expeditiously as funding becomes available.

Based on this review, the Performance Evaluation Report is approved as submitted.

If you have any questions, please contact me at (803) 898-4331.

Sincerely,

A handwritten signature in blue ink that reads "Susan B. Fulmer".

Susan B. Fulmer, P.G., Manager  
Federal Remediation Section  
Division of Site Assessment, Remediation, and Revitalization  
Bureau of Land and Waste Management
