Mr. Brian T. Hennessey  
SRS Remedial Project Manager  
Infrastructure and Area Completion Division  
U.S. Department of Energy  
Savannah River Operations Office  
P.O. Box A  
Aiken, South Carolina 29802

Dear Mr. Hennessey:

The U.S. Environmental Protection Agency has reviewed the 2017 Groundwater Mixing Zone Report for the R-Area Reactor Seepage Basins/108-4R Overflow Basin Operable Unit (OU) 25, SRNS-RP-2018-00625, Revision 0, June 2018. Based on the review of the document, the Operable Unit (OU) 25 for Calendar Year 2018 documents that the monitoring systems are *installed and operational* for the Monitored Natural Attenuation [MNA] remedy selected at this OU. The Groundwater Report also documents progress of the remedy in reaching the remedial goals. Based on the review of this 2018 Report, the document is approved as documenting the Remedial Action Completion for the MNA remedy at OU-25 at the Savannah River Site.

If you have any questions or require additional information, please contact Jon Richards at (404) 562-8648.

Sincerely,

*Glenn Adams*

H. Glenn Adams, Chief  
Restoration & Site Evaluation Branch  
Superfund & Emergency Management Division
