AREA COMPLETION PROJECTS

Dear Mr. Hennessey:

The U.S. Environmental Protection Agency (EPA) has reviewed Savannah River Site Comment Responses to EPA Comments on the Effectiveness Monitoring Report (EMR) for the Monitored Natural Attenuation (MNA) at the Chemicals, Metals, and Pesticides (CMP) Pits Operable Unit (OU), April 2019 through March 2020, Revision 0 dated June 2020.

EPA provides approval for the above mentioned report with the understanding that the delineated list of 15 separate data gaps and project needs noted at the end of the EPA comment letter (dated November 13, 2020) for the CMP report referenced, will be addressed at the upcoming meeting on April 28, 2021. EPA would like to discuss a more aggressive remedial approach based on the noted data gaps and projects needs as outlined in EPA's comment letter.

If you have any questions, please contact me at (404) 229 -9500.

Sincerely,

A handwritten signature in cursive script that reads "Diedre Lloyd".

Diedre Lloyd
Remedial Project Manager
Restoration and Sustainability Branch
Region 4, Superfund & Emergency Management Division
