Subject: Notification of the Change in the Submittal Date of the D-Area Groundwater Operable Unit Treatability Study Data Report

SRNS-J2000-2023-00713

Diedre and Heather,

I am submitting this email to inform you of a change in the annual submittal date of the D-Area Groundwater Operable Unit Treatability Study Data Report from January 31 to April 30 starting in 2024 in accordance with your approvals as explained below.

Savannah River Site (SRS) submitted the *Treatability Study Data Report for Groundwater Injection and Discharge Canal Neutralization at the D-Area Groundwater Operable Unit (OU) (U) 2022 Data and Information* (SRNS-TR-2023-00009, Revision 0, January 2023) on January 31, 2023. U.S. Environmental Protection Agency (EPA) and South Carolina Department of Health and Environmental Control (SCDHEC) provided comments on the report on April 13, 2023, and May 31, 2023, respectively. SRS submitted the responses to the regulatory comments on August 21, 2023. SCDHEC and EPA approved the SRS' responses to the regulatory comments on September 19, 2023, and October 2, 2023, respectively.

Based on regulatory approval of the responses, the due date for the annual submittal will be revised to April 30 in accordance with Section 7.0 Summary of the report, which states "To allow for the analysis and interpretation of calendar year 2023 data, SRS recommends that the next report be submitted by April 30, 2024." This change in the due date also applies to subsequent annual submittals of the report. Appendices D and E will be revised accordingly.

Please contact me if you have any questions, comments, or concerns.

Thanks
