**ENVIRONMENTAL BULLETIN FACT SHEET AVAILABLE FOR THE SECOND EARLY
REMEDIAL ACTION AT THE D-AREA OPERABLE UNIT AT THE SAVANNAH RIVER SITE**

Please make the above documents available to the general public for a minimum of 30 days for public comment beginning on April 29, 2021 and ending on May 28, 2021, after which they may be discarded.

Please acknowledge receipt of the document by email to Dexter.McDaniel@srs.gov. If you have any questions, please call me at (803) 952-7401 or e-mail me at above address.

Sincerely,

A handwritten signature in black ink, appearing to read "Dexter McDaniel", with a stylized flourish at the end.

Dexter McDaniel

Definitions:

Each entry in this Administrative Record File contains the following information:

ARF/IRF Catalog Number: A unique number assigned to each document or piece of information. This number appears in the upper right hand corner of the document.

Date: The date the document or information was issued.

Document Number: Many of the documents published or produced by SCDHEC, EPA and SRS are assigned unique numbers. If no document number has been assigned, the Catalog Number is used.

Title: The title of the document, or a brief description of the contents.

Author: The person or party responsible for the issuance or writing of the document or information.

Author Affiliation: The organization that the author works for or is affiliated with.

Addressee: In most cases this entry will be blank except if the document is correspondence. The entry in that case will be the organization(s) to which the Addressee is affiliated.

Appx. No. of Pages: The approximate number of pages the document contains.

Classification: The entry will contain one of the two following codes.

U: The information is unclassified and available to the general public for viewing.

CP: The information or document is considered confidential or privileged. The document may contain sensitive information and is not available to the general public. It may be included in an Administrative Record File as it was used to support the decision making, but cannot be made publicly available.

File Type: One of the following codes will be entered in this area:

ARF: This document is included in the Administrative Record File or Administrative Record for the unit. The document is physically located either in hard copy or on cd and is available to the general public for viewing and/or copying.

ARF-BRO: This document is included in the Administrative Record File or Administrative Record for the unit. The document will not be on cd because it is classified or privileged information, protected by copy-right laws, or is publicly available technical literature not generated for the unit at issue (i.e.; an engineering textbook).

IRF: This document is provided for information only. It is not used in the decision making process for the unit. It is physically located either in hardcopy or on cd and is available to the general public for viewing and/or copying.

IRF-BRO: This document is listed for information only. It was not used in the decision making process for the unit. It will not be microfilmed because it is protected by copyright laws or is publicly available.

Compact Disk (CD) Number: A typical entry is 101. The document associated with that catalog number is located on that cd in pdf format.

SAVANNAH RIVER SITE FACT SHEET

for the Second Early Remedial Action at D-Area Operable Unit

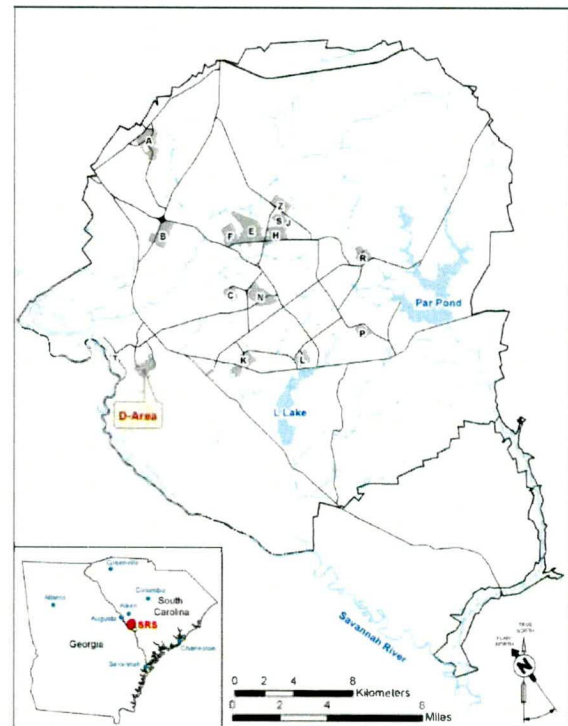

SEMS Number: 63
SRNS-RP-2020-00798, Revision 0, November 2020

LOCATION

The D-Area Operable Unit (DAOU) is listed as a Resource Conservation and Recovery Act 3004(u) Solid Waste Management Unit/Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) unit in Appendix C of the Federal Facility Agreement for the Savannah River Site (SRS). The DAOU is located in D Area approximately a half mile east of the Savannah River in the southwest quadrant of the SRS. The DAOU is composed of surface units and source areas in D Area that are potentially responsible for contaminating groundwater. Groundwater is being addressed separately under the D-Area Groundwater Operable Unit. DAOU has approximately 245 acres under Land Use Controls (LUCs).

HISTORY

The DAOU is comprised of multiple subunits and includes both deactivation and decommissioning facilities and active facilities associated with the operation of the 484-D Powerhouse. Two Early Action Record of Decisions (EA ROD) documented the selection of early action remedies to implement LUCs for completed DAOU subunits. The first DAOU EA ROD selected LUCs for the following DAOU subunits: Bubble Tower Subunit, Moderator Processing Subunit, and 489-D Coal Pile Runoff Basin (CPRB) (Northern 75%). The second DAOU EA ROD selected an early action remedy for subunits associated with the 484-D Powerhouse operations as follows: 488-1D Ash Basin (including two Inlet Basins), 488-2D Ash Basin, 488-4D Ash Landfill, and the 489-D CPRB (CPRB) (Southern 75%). The early action remedy selected in the second DAOU EA ROD is the subject of this Fact Sheet.

The 484-D Powerhouse was built in 1953 and was removed from service in 2012 after 59 years of operation. During its years of operation, the facility burned ~160,000 tons of coal per year. The media associated with the 484-D Powerhouse operations are coal, coal-combustion waste (ash), and contaminated soil. Removal actions for the 488-1D Ash Basin (including two Inlet Basins), 488-2D Ash Basin, 488-4D Ash Landfill, and the 489-D CPRB (Southern 75) have been completed, closing them in accordance with state regulations

SAVANNAH RIVER SITE FACT SHEET for the Second Early Remedial Action at D-Area Operable Unit

SEMS Number: 63
SRNS-RP-2020-00798, Revision 0, November 2020

and reducing risk from coal-related contaminants. Following the removal actions, a final remedial action was selected to manage risk from the coal-related contaminants that remain that may pose a threat to human health and the environment

SECOND DAOU EARLY REMEDIAL ACTION

The selected early action remedy for the 488-1D Ash Basin, 488-2D Ash Basin, and 488-4D Ash Landfill subunits of the DAOU is LUCs. No current or future development of DAOU is planned and land use is reasonably anticipated to remain industrial. LUCs (i.e., engineering controls [ECs] and institutional controls [ICs]) will be implemented to limit access (e.g., land use and disturbance activities) in the area. ECs (i.e., warning signs) and ICs (i.e., excavation permit restrictions and deed restrictions) will be used to restrict access to or activities that can be performed at the impacted areas. Site maintenance (site inspections, mowing, general housekeeping, repair of erosion damage, and other routine maintenance as needed) will be required to maintain the cover systems at the 488-1D Ash Basin and 488-4D Ash Landfill. LUCs will restrict the DAOU to future industrial use and will prohibit residential

use of the area. Unauthorized excavation will also be prohibited, and the waste units will remain undisturbed. LUCs will be maintained for as long as they are necessary and termination of any LUCs will be subject to CERCLA requirements for documenting changes to the remedial action.

No remedial action is needed for the 489-D CPRB (Southern 75%) or the Inlet Basins portion of 488-1D Ash Basin. These subunits pose no risk to human health and the environment and support unrestricted land use.
