Dear Ms. Fulmer and Mr. Richards:

SUBJECT: Statement of Basis/Proposed Plan for D-Area Ash Basin Wetlands (NBN) in Support of Savannah River and Floodplain Swamp Integrator Operable Unit (U) (SRNS-RP-2025-01449, Revision 0, November 2025), Statement of Basis/Proposed Plan Fact Sheet (SRNS-RP-2025-01448, November 2025), and Draft Public Notice Information, SEMS Number: 69

In accordance with the terms of the Federal Facility Agreement (FFA), the U. S. Department of Energy (DOE) is submitting the subject Statement of Basis/Proposed Plan (SB/PP), Fact Sheet, and Draft Public Notice Information for your review. Since the newspaper advertisement will read the same as the Environmental Bulletin, the draft of it is not included as an enclosure to this submittal letter. In July 2025, DOE, South Carolina Department of Environmental Services (SCDES) and U. S. Environmental Protection Agency (EPA) agreed that scoping of the SB/PP was not needed based on discussions and agreements reached at the July 8, 2024, Focused Corrective Measures Study/Feasibility Study (CMS/FS) scoping meeting. These agreements were documented in the Focused CMS/FS scoping summary (SRNS-RP-2024-00281, Final, July 2024) that was submitted to your agencies on October 29, 2024.

Please review the enclosures and provide your comments or approval within sixty (60) days of receipt. The time and effort that the SCDES and the EPA have given on the subject operable units are greatly appreciated.

NOV 10 2025

Ms. Susan Fulmer
Mr. Jon Richards

DRAFT ENVIRONMENTAL BULLETIN**Statement of Basis/Proposed Plan for D-Area Ash Basin Wetlands (NBN) in Support of Savannah River and Floodplain Swamp Integrator Operable Unit Available for Public Comment**

The United States Department of Energy (DOE) will release a Statement of Basis/Proposed Plan (SB/PP) for the D-Area Ash Basin Wetlands (no building number [NBN]) for the Savannah River and Floodplain Swamp Integrator Operable Units (IOU) on **Month Day, Year**, describing the preferred remedial approach for this Operable Unit (OU) at the Savannah River Site (SRS). The South Carolina Department of Environmental Services (SCDES) will also release a draft Resource Conservation and Recovery Act (RCRA) permit modification for the proposed remedial action for this OU. These documents will be available for public review and copying at the locations listed below. The forty-five (45) day public comment period is scheduled for **Month Day, Year**, to **Month Day, Year**.

The SB/PP was completed to meet the terms of the Comprehensive Environmental Response, Compensation, and Liability Act, a law governing the investigation and cleanup of waste units. DOE has worked with the United States Environmental Protection Agency-Region 4 (EPA) and the SCDES to ensure the remedial approach is consistent with all applicable environmental requirements. DOE, EPA, and SCDES have reviewed the risks associated with this unit and have evaluated the cleanup alternatives presented in this plan.

The D-Area Ash Basin Wetlands (NBN) is located downgradient of D Area. It is a forested mixed compositional bottomland wetland that received overflow ash from the D-Area Ash Basins via an upgradient drainage ditch. The D-Area Ash Basin Wetlands ash depositional area has an estimated area of 90 acres with an estimated volume of 739,000 cubic yards of ash. Remedial action is needed at this unit because arsenic and coal-related radionuclides (potassium-40, thorium-232, and uranium-238) are present in surface ash/soils that may pose a threat to human health and the environment. Groundwater will be addressed as part of the D-Area Groundwater OU characterization and cleanup decisions.

The proposed remedy for the OU is Land Use Controls (LUCs) to prevent human exposure to arsenic and coal-related radionuclides present in surface ash/soils that pose an unacceptable risk to the onsite worker. LUCs include posting and maintenance of warning signs and the establishment of administrative and worker access controls to effectively reduce exposure of contaminated media to human receptors. General public access to the site is limited to site workers. This remedy does not support unrestricted land use and will require five-year remedy reviews.

Comments on the SB/PP and the draft RCRA permit are requested by **Month Day, Year**. Upon completion of the public comment period, a Responsiveness Summary that addresses public comments will be prepared. The Responsiveness Summary will be made available with the Record of Decision and the final RCRA permit modification and will be sent to each person who submits comments.
