AREA COMPLETION PROJECTS

Re: Record of Decision / Remedial Alternative Selection for the Early Construction and Operational Disposal Site N-1 (NBN), Central Shops Scrap Lumber Pile (631-2G), and Building 690-N, Process Heat Exchanger Repair Facility (aka Ford Building) Operable Unit (U), SEMS Number: 93 (SRNS-RP-2022-01284, Revision 0, March 2023) received March 9, 2023.

Dear Mr. Hennessey:

The Department has completed its review of the above referenced document pursuant to the Savannah River Site Federal Facility Agreement. The attached comments were generated as a result of this review. These comments must be addressed prior to final approval of the above referenced document. As specified in Section XXII, Review/Comment on Documents, the appropriate technical staff will be available to participate in a joint DOE/EPA/DHEC comment resolution meeting to discuss these comments, if necessary.

To schedule a meeting to resolve the attached comments or to obtain further information, please contact me at (803) 898-4331.

Sincerely,

Susan B. Fulmer Digitally signed by Susan B. Fulmer

Specific Comments

1. Section V. Operable Unit Characteristics, CSSLP and Ford Building Subunits, page 14. For the sake of consistency with the approved SB/PP and throughout Section V, at the end of the second paragraph for the Upland Area discussion, please add the following sentence: "Arsenic was identified as a problem warranting action in surface soil for residential and industrial worker receptor scenarios." Also, for the Ford Building Subunit, add the following to the end of the first sentence: "for the residential and industrial worker scenarios."
