**Subject:** Update on the Operational Status of the M-Area Inactive Process Sewer Lines (081-M) Operable Unit Active Soil Vapor Extraction Unit

SRNS-J2000-2018-00428

Diedre, Jon, Heather,

Reference: Email, S. McFalls (SRNS) to H. Cathcart (SCDHEC), J. Richards (EPA), and D. Lloyd (EPA), *Notification of the Operational Status of the M-Area Inactive Process Sewer Lines (081-M) Operable Unit Active Soil Vapor Extraction Unit*, SRNS-J2000-2018-00379, dated June 21, 2018

In the referenced email, the Savannah River Site notified you that the M-Area Inactive Process Sewer Lines (081-M) (MIPSL) Operable Unit (OU) active soil vapor extraction unit (SVEU) had been inoperable since June 14, 2018 due to the lockout of the M-1 Air Stripper. This email serves as notification that repairs to the M-1 Air Stripper system were completed, the lockout removed, and the M-1 Air Stripper system and the MIPSL OU active SVEU resumed operation on July 3, 2018.

Please contact me if you have any questions, comments, or concerns.

Thanks
