

The Savannah River Site Environmental Bulletin

September 24, 2020

Volume 32, Number 9

Administrative Record File Available on the Savannah River Site External Web Page

In the interest of community involvement, the Savannah River Site (SRS) has begun the process of posting the Administrative Record File/Information Repository File (ARF/IRF) on the SRS external web site (www.srs.gov). The ARF/IRF is available on the Area Completion Projects ARF/IRF web page (<https://www.srs.gov/general/programs/soil/arf/arfirf.html>). The ARF/IRF web page contains an Index of Documents and the initial group of portable document format (PDF) records from the ARF/IRF. The initial group of ARF/IRF records was posted on August 11, 2020 and contains records that are dated between October 1, 2017 and July 31, 2020 in the word-searchable database. The ARF/IRF PDFs on the external web page will be updated on an approximately quarterly basis until all ARF/IRF records are included.

The Comprehensive Environmental Response, Compensation, and Liability Act and the National Oil and Hazardous Substances Pollution Contingency Plan require the establishment of an administrative record that documents the investigation and selection of remedial alternatives / response actions. The Federal Facility Agreement for the Savannah River Site states that the United States Department of Energy (DOE) shall establish and maintain an Administrative Record for the SRS. The records are currently accessible in electronic format at the libraries of the University of South Carolina (USC)-Aiken and USC-Columbia. The ARF/IRF is maintained by Savannah River Nuclear Solutions, LLC for the DOE-Savannah River.
