Aiken, South Carolina 29802

RE: Decommissioning Project Final Report (DPFR): Building 683-D, D-Area Chlorine Unloading and Storage (V-PCOR-D-00045, Revision 0, August 11, 2022); Cover letter dated August 24, 2022

Dear Mr. Hennessey:

The South Carolina Department of Health and Environmental Control (SCDHEC) has reviewed the referenced document with respect to the Memorandum of Agreement for Achieving an Accelerated Cleanup Vision for the Savannah River Site (SRS) and has generated the following comment.

Section 1.0, Summary states, "No hazardous, chemical or radioactive materials were associated with this structure." This statement, and a similar statement in Section 6.02, Risk Assessment Summary (2nd paragraph, line 2), are contradicted by the Facility Description, Section 2.01 which states that the Chlorine Unloading and Storage Building housed a sodium hypochlorite injection system. Please address the apparent discrepancy.

If you have any questions, please contact Leigh Beatty at 803-642-1637 or via e-mail at beattykl@dhec.sc.gov.

Sincerely,

A handwritten signature in blue ink that reads 'Gregory N. O'Quinn'.
