## AREA COMPLETION PROJECTS

Brian T. Hennessey, SRS Remedial Project Manager  
Infrastructure and Area Completion Division  
U. S. Department of Energy  
Savannah River Operations Office  
Post Office Box A  
Aiken, South Carolina 29802

RE: Decommissioning Project Final Report (DPFR): Chemical Feed Facility, Building 607-14D (V-PCOR-D-00074, Revision 0, March 31, 2022); Cover letter dated April 18, 2022

Dear Mr. Hennessey:

The South Carolina Department of Health and Environmental Control (SCDHEC) has reviewed the referenced document with respect to the Memorandum of Agreement for Achieving an Accelerated Cleanup Vision for the Savannah River Site (SRS) and has generated the following comment.

The top of Page 9 states, "The concrete pad for the 607-12D station **is** [present tense] 10' by 10'." In addition, Figure A-8 on Page 17 appears to indicate that the concrete pad surrounding the filled-in pit has been left in place. Please revise *Section 4.0, Decommissioning Activities Completed* and *Section 6.01, Final Facility Condition and Remaining Hazards* to clearly state that the end-state for 607-12D includes the concrete pad.

If you have any questions, please contact Leigh Beatty at 803-642-1637 or via e-mail at [beattykl@dhec.sc.gov](mailto:beattykl@dhec.sc.gov).

Sincerely,

A handwritten signature in black ink that reads "Gregory N. O'Quinn".
