CAUTION

The Inspector IMMEDIATELY notifies the Post Closure Manager and Environmental Compliance Authority if there has been a breach or compromise of the institutional controls of this waste unit. This notification is made in accordance with Savannah River Site post closure inspection procedures.

NOTE

1. Manual C3, Volume 1, Procedure ER-SOP-019, Waste Unit and IOU Inspection and Maintenance, may be referenced for inspection details.
2. Monitoring wells associated with this waste unit are maintained in accordance with Environmental Compliance & Area Completion Projects (EC&ACP) monitoring well procedures.
3. Steps in this checklist may be completed concurrently or in any order.
4. Unsatisfactory conditions found during the inspection may be listed on the detailed map of the inspected area.

SCHEDULED

UNSCHEDULED

A = Satisfactory X = Unsatisfactory (Explanation required)		A or X	Observation/Corrective Action Taken
1.	VERIFY roads to waste unit are accessible.	A	
2.	VERIFY gates and fence are in good condition and all unattended gates are locked.	A	
3.	INSPECT for excessive vegetative growth which may obstruct warning signs and visibility of inspection areas.	A

SCHEDULED UNSCHEDULED

A = Satisfactory X = Unsatisfactory (Explanation required)		A or X	Observation/Corrective Action Taken
4.	VERIFY waste unit signs (12) are in acceptable condition, have correct information, and are legible from a distance of 25 feet.	A	
5.	INSPECT soil cover for signs of erosion, abnormal soil cracks, ponding, or depressions (subsidence).	X	Carry Over Item (COI): Four (4) areas of shallow subsidence. One new area subsidence discovered during this inspection. See Map Note: 1 Reference Maintenance Register PC-2022-00125
6.	INSPECT for signs of burrowing animals.	X	Active Ant Mounds on soil cover. See Map Note: 2 Reference Maintenance Register: PC-2023-00059
7.	VISUALLY INSPECT vegetative cover for grass density, with no bare spots more than 3 feet by 3 feet in the area. (The height of vegetative cover should not impair visual inspection of soil cover. This will be determined by the Inspector.)	A	
8.	INSPECT integrity of drainage system for presence of excessive erosion, sediment build-ups, slumping of banks, and any debris restricting water flow.	A	
9.	INSPECT integrity of catch basins, including inlet/outlet drainage structures. (Basins shall be cleaned every two years or when Inspector or Post Closure Manager determines capacity of basin has been reduced by greater than 50 percent.)	A	
10.	INSPECT gas vents for signs of damage or obstructions.	A	
11.	INSPECT subsidence monitors annually for damage and visibility.	A

MAP OF SANITARY LANDFILL (BUILDING 740-G)

NOTES: 1=COI: Four (4) areas of shallow subsidence located on the Northern end. Site Services will repair the areas per engineering guidance by filling the areas with topsoil, grade to existing terrain, add grass seed, straw and monitor the area to ensure subsidence does not return. Note: A fifth subsidence area was found adjacent (East) of the others described above. The more recently discovered fifth area is similar to the original four (4). The fifth area will be added to the original Post Closure Maintenance Register (PC-2022-00125) and repaired with engineering concurrence and repair guidance listed above.

2=Active Ant Mounds on soil cover. Applied 1.0 lbs. of extinguish ant bait.
