Re: Continued Usage of 242-25H (3H) Evaporator Pot, SEMS Number: 89 (dated May 11, 2018, and received May 14, 2018).

Dear Mr. Hennessey:

The South Carolina Department of Health and Environmental Control (the Department) has reviewed the referenced letter requesting approval for the continued usage of the 242-25H (3H) Evaporator Pot. The Department approves the continued usage of the 3H Evaporator Pot as it is essential for the closure of future high-level radioactive waste tanks at the Savannah River Site.

If any new leak sites on the 3H Evaporator Pot are discovered, the Department must be notified immediately. Further evaluation will be needed to determine if adverse impacts to human health or the environment have occurred.

If you should require any further clarification on this matter, please contact me at (803) 898-4331.

Sincerely,

A handwritten signature in blue ink that reads 'Susan B. Fulmer'.

Susan B. Fulmer, P.G., Manager
Federal Remediation Section
Division of Site Assessment, Remediation, and Revitalization
Bureau of Land and Waste Management
