Re: Continued Usage of High-Level Waste Tank 7F, SEMS Number: 23 (dated April 3, 2018, and received April 5, 2018).

Dear Mr. Hennessey:

The South Carolina Department of Health and Environmental Control (the Department) has reviewed the referenced letter requesting approval for the continued usage of Type I Tank 7F for which the Bulk Waste Removal Efforts (BWRE) milestone has previously been completed. The Department approves the usage of Tank 7F to support Tank 3F saltcake dissolution and transfer of dissolved salt solution to support preparation of future salt batches for waste treatment. The usage of this tank should not result in any appreciable accumulation of additional solids within Tank 7F as a result of this approval.

Should the Department of Energy propose further usage of Tank 7F or any other tank for which BWRE has been completed, an additional request and justification will need to be submitted to the Department for review and consideration.

If you should require any further clarification on this matter, please contact me at (803) 898-4331.

Sincerely,

A handwritten signature in blue ink that reads 'Susan B. Fulmer'.

Dexter,

SRR retrieved SRNS-OS numbers for the ARFs listed below. Will you please add these numbers to the applicable ARF records?

Please contact me if you have any questions, comments, or concerns.

Thanks

Subject: AFR Documents

Good morning,

Since I didn't see a document number in the ARF database, I have given SRR-OS numbers to the following ARF documents:

- ARF-021463 is SRR-OS-2018-00048, and
- ARF-021485 is SRR-OS-2018-00049.

I knew document numbers are added to the ARF database if they are known, so I wanted to make sure I sent this information to you.

Thanks,

Brooke Kinard
