Mr. Jon Richards
Savannah River Site Remedial Project Manager
Superfund and Emergency Management Division
U. S. Environmental Protection Agency, Region 4
61 Forsyth Street, SW
Atlanta, Georgia 30303

Dear Ms. Fulmer and Mr. Richards:

SUBJECT: Early Action Statement of Basis/Proposed Plan for the Beneficial Reuse of Select Coal Ash and Coal Fines at the A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basin (188-K), and L-Area Ash Basin (188-L) Operable Units (U) (SRNS-RP-2025-01221, Revision 0, October 2025), Early Action Statement of Basis/Proposed Plan Fact Sheet (SRNS-RP-2025-01261, October 2025), and Draft Public Notice Information, SEMS Numbers: 61, 62, 88, 90, & 91

In accordance with the terms of the Federal Facility Agreement (FFA), the U. S. Department of Energy (DOE) is submitting the subject Early Action Statement of Basis/Proposed Plan (SB/PP), Early Action Fact Sheet, and Draft Public Notice Information for your review. Since the newspaper advertisement will read the same as the Environmental Bulletin, the draft of it is not included as an enclosure to this submittal letter. In July 2025, DOE, South Carolina Department of Environmental Services (SCDES) and U. S. Environmental Protection Agency (EPA) agreed that scoping of the Early Action SB/PP was not needed based on discussions and agreements reached at the November 2, 2023, Focused Early Action Corrective Measures Study/Feasibility Study (CMS/FS) scoping meeting. These agreements were documented in the Focused Early Action CMS/FS scoping summary (SRNS-RP-2023-00858, Final, November 2023) that was submitted to your agencies on October 7, 2024.

Please review the enclosures and provide your comments or approval within sixty (60) days of receipt. The time and effort that the SCDES and the EPA have given on the subject operable units are greatly appreciated.

Ms. Susan Fulmer
Mr. Jon Richards

DRAFT ENVIRONMENTAL BULLETIN**Early Action Statement of Basis/Proposed Plan for the A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basin (188-K), and L-Area Ash Basin (188-L) Operable Units Available for Public Comment**

The United States Department of Energy (DOE) will release an Early Action Statement of Basis/Proposed Plan (SB/PP) for the A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basin (188-K), and L-Area Ash Basin (188-L) Operable Units (OUs) on **Month Day, Year**, describing the preferred remedial approach for these units at the Savannah River Site (SRS). The South Carolina Department of Environmental Services (SCDES) will also release a draft Resource Conservation and Recovery Act (RCRA) permit modification for the proposed remedial action for these units. These documents will be available for public review and copying at the locations listed below. The forty-five (45) day public comment period is scheduled for **Month Day, Year**, to **Month Day, Year**.

The Early Action SB/PP was completed to meet the terms of the Comprehensive Environmental Response, Compensation, and Liability Act, a law governing the investigation and cleanup of waste units. DOE has worked with the United States Environmental Protection Agency-Region 4 (EPA) and the SCDES to ensure the remedial approach is consistent with all applicable environmental requirements. DOE, EPA, and SCDES have reviewed the risks associated with this OU and have evaluated the cleanup alternatives presented in this plan.

The A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basin (188-K), and L-Area Ash Basin (188-L) OUs are located in various areas of the SRS. A remedial action is needed at these remaining coal ash and coal fines OUs. Arsenic, naturally occurring radionuclides, and contaminants with the potential to migrate to groundwater and exceed action levels within 1,000 years are present in ash/soils at levels that may pose a threat to human health and the environment.

The proposed remedy for the OUs consists of Land Use Controls (LUCs) with Beneficial Reuse and will be implemented in two phases. Phase 1 would implement LUCs for each of the remaining coal ash and coal fine OUs. LUCs include posting and maintenance of warning signs and the establishment of administrative and worker access controls to effectively reduce exposure of contaminated media to human receptors. This phase does not support unrestricted land use and five-year remedy reviews would be required. Due to contaminant migration concerns at the H-Area Ash Basin (288-H) and L-Area Ash Basin (188-L) OUs, groundwater monitoring wells would be installed/identified and monitored every five years to coincide with the remedy reviews. Groundwater beneath the F-Area Ash Landfill (288-F) would continue to be monitored semi-annually per the existing permit. The 288-F Ash Landfill will remain a permitted operating landfill until Phase 2 of the proposed remedy is initiated. Groundwater will be addressed as part of the respective area groundwater OU characterization and cleanup decisions. Any cleanup of groundwater contamination will take place under those separate closure agreements. The monitoring of groundwater at these units is to verify that contaminants associated with the ash units do not migrate to groundwater above regulatory limits.

Phase 2 of the remedy includes excavation of the ash and its beneficial reuse. Beneficial reuse will involve the excavation of contaminated ash/soil for later incorporation into a reuse option.

DRAFT ENVIRONMENTAL BULLETIN

Early Action Statement of Basis/Proposed Plan for the A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basin (188-K), and L-Area Ash Basin (188-L) Operable Units Available for Public Comment

Following completion of the excavation activities, the ash units will be restored (i.e., contoured for proper drainage and revegetated as necessary). LUCs will remain in place until beneficial reuse can occur. Phase 2 is effective in eliminating human exposure to contaminants and preventing direct radiation exposure by physically removing the source. Proven unencapsulated beneficial reuse alternatives for coal ash/fines include use as a fill material, or as an additive or replacement for cement in concrete mixes. Once implemented this phase of the proposed remedy supports unrestricted land use and would not require five-year remedy reviews.

Comments on the Early Action SB/PP and the draft RCRA permit are requested by **Month Day, Year**. Upon completion of the public comment period, a Responsiveness Summary that addresses public comments will be prepared. The Responsiveness Summary will be made available with the Early Action Record of Decision and the final RCRA permit modification and will be sent to each person who submits comments.

To aid in the review of the Early Action SB/PP, an Early Action SB/PP Fact Sheet for the OUs was prepared.

Copies of the Early Action SB/PP and the Fact Sheet are available in the Administrative Record. The Administrative Record is available in the information repositories listed below:

US Department of Energy
Public Reading Room
Gregg-Graniteville Library
University of South Carolina – Aiken
471 University Parkway
Aiken, South Carolina 29801

**DRAFT APPENDIX VIII-A
SOLID WASTE MANAGEMENT UNIT REMEDY SELECTION**

Solid Waste Management Unit	Remedy Selection
A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basini (188-K), and L-Area Ash Basin (188-L) Operable Units (OUs)	The A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basin (188-K), and L-Area Ash Basin (188-L) subunits shall be remediated by Land Use Controls with Beneficial Reuse by the Permittee as documented in the approved Early Action Statement of Basis/Proposed Plan (SRNS-RP-2025-01221, Revision #, MM 2026) and the effective Early Action Record of Decision for the OUs (SRNS-RP-YYYY-XXXXX, Revision #, MM YYYY).

ANNOUNCER:

The U. S. Department of Energy (D-O-E) released an Early Action Statement of Basis / Proposed Plan on **Month Day, Year** for A-Area Ash Pile (788-A), A-Area Coal Pile Runoff Basin (788-3A), F-Area Ash Landfill (288-F), H-Area Ash Basin (288-H), K-Area Ash Basini (188-K), and L-Area Ash Basin (188-L) Operable Units (OUs) at the Savannah River Site (S-R-S). The proposed remedy consists of Land Use Controls with Beneficial Reuse. The South Carolina Department of Environmental Services (S-C-D-E-S) also released a draft hazardous waste permit modification for the remedy; the draft is available at S-C-D-E-S's Midland Aiken Environmental Affairs Office. The public is invited to review and comment on the proposed remedy.

This document is available at the D-O-E Public Reading Rooms at the University of South Carolina – Aiken, Augusta University, the University of South Carolina – Columbia, Savannah State University, and is available on the S-R-S webpage, www.srs.gov.

Written comments and requests for a public hearing must be received no later than **Month Day, Year** by Kent Krieg of S-C-D-E-S at kent.krieg@des.sc.gov or Barbara Smoak of S-R-S at barbara.smoak@srs.gov.
