EPA Comments: Decommissioning Project Final Report 720-F, Central Alarm Station (CAS) (V-PCOR-F-00098, Revision 0, September 11, 2026)

Dear Mr. Baker,

The U.S. Environmental Protection Agency, Region 4 (EPA), has reviewed the Decommissioning Project Final Report 720-F, Central Alarm Station (CAS), R0, dated 9/17/26. EPA's comment is attached:

If you have any questions or require additional information, please contact me at (404) 431-1340.

Sincerely,

JON RICHARDS Digitally signed by JON RICHARDS Date: 2026.10.28 18:12:34 -04'00'

Jon Richards
FFA Remedial Project Manager
Superfund & Emergency Management Division

Susan Fulmer, SCDES

GENERAL COMMENT

1. The text in Section 1.0 (Summary) states that there was no evidence of contamination on the slab either before or after structure demolition; however, the text in Section 4.0 (Decommissioning Activities Completed) states that the stained concrete identified in the facility decommissioning evaluation (FDE) was treated with surfactant during the decommissioning process. Additionally, the text in Section 6.01 (Final Facility Condition and Remaining Hazards) states that any stains identified on the concrete slab during decommissioning were pressure washed and/or cleaned. *Please revise the DPFR to clarify whether contamination existed on the concrete slab.*
