Columbia, South Carolina 29201

Dear Ms. Fulmer:

SUBMITTAL OF SAVANNAH RIVER SITE INVESTIGATION-DERIVED WASTE MANAGEMENT PLAN, APPENDICES A, B, AND C (WSRC-RP-94-1227, REDLINE REVISION 9K, JULY 2024)

The Savannah River Site (SRS) has performed a review of the values listed in Appendices A and B of the approved SRS Investigation-Derived Waste (IDW) Management Plan (WSRC-RP-94-1227, Revision 9, October 2007). Based on this review, the values of the health-based limits (HBLs) for chemicals and radionuclides have been updated. The chemical HBLs in Appendix A - Aqueous IDW and Appendix B - Non-Aqueous IDW were updated to reflect the values found in the May 2024 U.S. Environmental Protection Agency's (EPA) Regional Screening Levels. Other changes include, but are not limited to, updating South Carolina Department of Health and Environmental Control to South Carolina Department of Environmental Services, adding entries for various per- and polyfluoroalkyl substances (PFAS) to Appendices A and B, updating the Appendix A chemical HBLs and sources for PFAS added to the National Drinking Water Standards. Appendix C - Summary of Changes provides a list of revisions to Appendices A and B. SRS plans to develop a clean copy of the appendices and implement the updated HBLs upon regulatory approval.

Please review the enclosed appendices and provide your comments or approval within thirty (30) days of receipt. If you have any questions or comments regarding this submittal, please contact Ms. Shelia McFalls at (803) 952-6819, or via email at shelia.mcfalls@srs.gov.

Sincerely,

Amy J. Meyer, Manager
Environmental Compliance
Environmental Compliance & Area Completion Projects
